

RFS-6

Batch Feed Scale

Rotem's **RFS-6** is a precision feed control system enabling poultry growers to monitor feed flow into the chicken house accurately and continuously; specifically targeted versions for broilers, breeders and pullets are available.

Benefits:

- **Program for breeders & pullets:** RFS-6 manages restricted feeding procedures, distinguishes males from females, and allocates accurate quantities of feed to each feeding line at preset times.
- **Program for broilers:** RFS-6 controls up to 10 light & feeding cycles per day, monitors feed consumption, and mixes 3 types of feed - adapting the mix to specific growth days.
- Rotem's **advanced communication** software enables remote Monitoring & Control.

Main features:

- Restricted feeding
- Up to 10 feeding times per day
- Separate female & male programs
- Feed scale
- Optional water meter
- Saves feed & water consumption history
- Alarms
- Can be controlled remotely
